

Full Stack Developer (7+ Years Experience)

Employment Type: Full-Time

Gender: Male / Female

Location: Ambattur Industrial Estate

About the Role:

We are looking for an experienced Full Stack Developer to lead and support the development of our internal applications. The ideal candidate will be responsible for designing, developing, and maintaining scalable web applications while ensuring high performance and responsiveness.

Key Responsibilities:

- Develop and maintain robust front-end and back-end components of internal applications
- Design and implement scalable architecture and database structures
- Collaborate with cross-functional teams to define, design, and ship new features
- Ensure code quality through best practices, testing, and code reviews
- Troubleshoot, debug, and upgrade existing systems
- Optimize applications for maximum speed and scalability
- Maintain documentation of development processes and systems

Required Skills & Qualifications:

- Minimum **7+ years of experience** in full stack development
- Strong proficiency in front-end technologies (HTML, CSS, JavaScript, frameworks like React/Angular/Vue)
- Strong experience in back-end technologies (Node.js / Python / Java / .NET)
- Experience with database management systems (MySQL, PostgreSQL, MongoDB, etc.)
- Familiarity with RESTful APIs and microservices architecture
- Experience with version control systems (Git)
- Strong problem-solving and analytical skills

- Deep understanding of the business and able to translate into the required logical language.
